) **FOR SUMMARY JUDGMENT OF**  
) **INVALIDITY UNDER 35 U.S.C. § 112 OF**  
) **THE '992, '863 AND '702 PATENTS**

On \_\_\_\_\_, 2009, the Motions for Summary Judgment of Invalidity under 35 U.S.C. § 112 of the Round 3 Defendants (Time Warner Inc. and CSC Holdings, Inc.) were heard. The Round 3 Defendants seek an order declaring claims 41, 45 and 46 of the asserted U.S. Patent No. 5,132,992, claims 17-19 of the asserted U.S. Patent No. 5,550,863, and claims 1-42 of the asserted U.S. Patent No. 6,144,702 invalid for failure to comply with the written description, enablement, and/or definiteness requirements of 35 U.S.C. § 112.

After considering the materials and oral argument presented by the parties, and good cause appearing:

IT IS HEREBY ORDERED that Defendants' motions are GRANTED. Defendants have shown that there are no genuine issues of material fact and that they are entitled to judgment as a matter of law that asserted claims 41, 45 and 46 of U.S. Patent No. 5,132,992, asserted claims 17-19 of U.S. Patent No. 5,550,863 and asserted claims 1-42 of U.S. Patent No. 6,144,702 (collectively, the "Asserted Claims") are invalid under 35 U.S.C. § 112 for the following reasons:

1. Each Asserted Claim is invalid under 35 U.S.C. § 112 because "transmission system" is not adequately described or enabled;

2. Claims 1-42 of U.S. Patent No. 6,144,702 and claims 17-19 of U.S. Patent No. 5,550,863 are invalid under 35 U.S.C. § 112 because the "reception system" of claims 1-42 of U.S.

1 Patent No. 6,144,702 and the “local distribution system” of claims 17-19 of U.S. Patent No.  
2 5,550,863 are not adequately described or enabled;

3 3. Claims 41, 45 and 46 of U.S. Patent No. 5,132,992 and claims 17-19 of U.S. Patent  
4 No. 5,550,863 are invalid under 35 U.S.C. § 112 because the “sequence of addressable data blocks”  
5 of these claims is not adequately described or enabled;

6  
7 4. Claims 41 and 45 of U.S. Patent No. 5,132,992 and claims 17-19 of U.S. Patent No.  
8 5,550,863 are invalid under 35 U.S.C. § 112 because a method of transmitting information that is not  
9 responsive to user requests is not adequately described or enabled, and because by claiming such a  
10 method the applicants failed to satisfy the requirement of 35 U.S.C. § 112 ¶ 2 that they claim only  
11 what they regard as their invention;

12 5. Claims 41, 45 and 46 of U.S. Patent No. 5,132,992 are invalid under 35 U.S.C. § 112  
13 because a method of transmitting information to “remote locations” that do not have a receiving  
14 system is not adequately described or enabled and because by claiming such a method the applicants  
15 failed to satisfy the requirement of 35 U.S.C. § 112 ¶ 2 that they claim only what they regard as their  
16 invention;

17  
18 6. Claims 17-19 of U.S. Patent No. 5,550,863 are invalid under 35 U.S.C. § 112 because  
19 a method of transmitting information to a reception system without storing compressed data in the  
20 transmission system prior to transmission is not adequately described or enabled;

21  
22 7. Claim 46 of U.S. Patent No. 5,132,992 is invalid under 35 U.S.C. § 112 because a  
23 method that does not require that “requests from users” identify the reception system to which the  
24 information is to be sent is not adequately described or enabled;

25 8. Claims 17-19 of U.S. Patent No. 5,550,863 are invalid under 35 U.S.C. § 112 because  
26 “inputting an item having information into the transmission system” is not adequately described or  
27 enabled;

1           9.       Claims 17-19 of U.S. Patent No. 5,550,863 are invalid under 35 U.S.C. § 112 because  
2 “assigning a unique identification code to the item having information” is not adequately described or  
3 enabled;

4           10.      Claims 17-19 of U.S. Patent No. 5,550,863 are invalid under 35 U.S.C. § 112 because  
5 a method using a “receiving system” that is “local” with respect to a “subscriber receiving station” is  
6 not adequately described or enabled, and because the term “local” is indefinite;

7           11.      Claims 41, 45 and 46 of U.S. Patent No. 5,132,992 are invalid under 35 U.S.C. § 112  
8 because “storing items having information in a source material library” is not adequately described or  
9 enabled;

10          12.      Claims 41, 45 and 46 of U.S. Patent No. 5,132,992 are invalid under 35 U.S.C. § 112  
11 because “retrieving the information in the items from the source material library” is not adequately  
12 described or enabled;

13          13.      Claim 46 of U.S. Patent No. 5,132,992 is invalid under 35 U.S.C. § 112 because  
14 “generating a listing of available items” in claim 46 is not adequately described or enabled;

15          14.      Each Asserted Claim is invalid under 35 U.S.C. § 112 as indefinite because require it  
16 requires an “identification encoder”;

17          15.      Claims 1-26 and 32-33 of U.S. Patent No. 6,144,702 are invalid under 35 U.S.C. § 112  
18 as indefinite because they contain the term “sequence encoder”;

19          16.      Claims 17-19 of U.S. Patent No. 5,550,863 are invalid under 35 U.S.C. § 112 because  
20 the step of transmitting “to at a plurality of receiving stations” is indefinite;

21          17.      Claims 41, 45 and 46 of U.S. Patent No. 5,132,992 are invalid under 35 U.S.C. § 112  
22 as indefinite because the steps of the claims can never be completed;

1           18.     Claims 45 and 46 of U.S. Patent No. 5,132,992 are invalid under 35 U.S.C. § 112 as  
2 indefinite because claim 45's requirement of "separately storing a plurality of files" is inconsistent  
3 with claim 41 from which it depends; and

4           19.     Claim 46 of U.S. Patent No. 5,132,992 is invalid under 35 U.S.C. § 112 as indefinite  
5 because claim 46's requirement of retrieving data blocks corresponding to "requests" from "users" is  
6 inconsistent with claim 41 from which it indirectly depends.
